PROFESSIONAL SUMMARY

I'm a 4th-year Information Technology student who learns by building — 10+ projects so far, from enrollment systems to quiz apps and interactive learning tools, plus 11 Cisco certifications in security, networking, and Python. Always working on something new.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, PHP, Python, SQL

Databases & Tools: MySQL, Git & GitHub, Responsive Design, UI/UX

Office Productivity: Microsoft Excel, Microsoft Word

Frameworks & Platforms: React, Node.js, Laravel, Livewire, FastAPI, Flask, WordPress

Networking & Security: TCP/IP, Firewalls, Endpoint Security, Troubleshooting (Cisco certified)

PROJECTS

Flip Check – Resale Profit Simulator

2026

Laravel 12, Livewire, PHP, MySQL, Blade

- Built a resale-profit simulator that evaluates secondhand purchases before you buy them: full cost breakdown with break-even price, resale value range, and a max-offer calculator.
- Engineered the pricing engine with 100-run Monte Carlo simulation and Doable / Risky / Avoid verdicts, delivered through a reactive Livewire interface with repair planner and market-scenario slider.

Palale Enrollment System

2026

PHP, MySQL, HTML, CSS — palale-enrollment-system.onrender.com

- Built a web-based enrollment system managing student registration, subjects, and enrollment records.
- Developed a secure admin dashboard with authentication, CRUD operations, and input validation.
- Deployed live on Render with a fully responsive layout for desktop and mobile users.

Quizard – QuizForge App

2026

JavaScript, HTML, CSS — quizard-app.github.io

- Created an interactive quiz platform with dynamic question generation and real-time score tracking.
- Implemented a responsive, mobile-friendly interface and deployed via GitHub Pages.

Interactive Web Applications Suite

2024 – 2026

JavaScript, HTML, CSS, Canvas

- Developed a multiplayer Snake and Ladder game with dice rolling and animated movement.
- Built a Polygon Shapes Visualizer using Canvas for interactive geometry education.
- Created a color-coded Periodic Table Explorer with detailed element information.

Personal Portfolio Websites

2026

WordPress, PHP, Google Sites

- Designed and deployed two portfolio sites: a custom-themed WordPress portfolio (jazzfer.great-site.net) and an accessible secondary portfolio on Google Sites.

EDUCATION

Bachelor of Science in Information Technology

2023 – Present

Nueva Ecija University of Science and Technology (NEUST) – Papaya Off-Campus, General Tinio, Nueva Ecija

4th Year — Focus: Web Development, Database Management, Software Engineering

- Relevant coursework in programming, databases, networking, and cybersecurity.

Rio Chico National High School

2016 – 2022

Junior High School, Grades 7–10 (2016 – 2020) · Senior High School, Grades 11–12 (2020 – 2022)

Rio Chico Elementary School

2009 – 2016

Pre-Elementary (2009) · Grades 1–6 (2010 – 2016)

CERTIFICATIONS

Cisco Networking Academy (11 course completions, 2023 – 2025):

Network Defense · Dec 2025

Firewalls, PKI, cloud security, data protection.

Cyber Threat Management · Dec 2025

Vulnerability assessment, risk management, forensics.

Introduction to Data Science · Dec 2025

Data analytics, AI and machine learning fundamentals.

Digital Safety and Security Awareness · Dec 2025

Threat recognition, response, and mitigation.

Introduction to Cybersecurity · May 2024

Threats, attacks, vulnerabilities, career pathways.

Networking Basics · Dec 2023

Protocols, Ethernet, IPv4, routing, connectivity troubleshooting.

Ethical Hacker · Nov 2025

Penetration testing; wired, wireless, cloud, and mobile vulnerabilities.

Endpoint Security · Nov 2025

Threat mitigation and endpoint evaluation.

Python Essentials 1 (OpenEDG) · Nov 2025

Python 3 programming; PCEP certification track.

Security and Connectivity Support · Dec 2025

Network troubleshooting and malware response.

Computer Hardware Basics · May 2024

PC assembly, repair, maintenance, and safety.

WEBINARS & SEMINARS

Attended 9 industry webinars (2026) covering network security, information security management, cloud infrastructure, Python development, data analytics, and generative AI.
